

11/06/15

(Lecture no)
15, 16

Linked Lists:-

- Linked Lists works on nodes.

Basically Nodes has two ~~part~~ parts:-

- Linked List has two types:-

- i) Singly Linked List
- ii) Doubly Linked List

- Singly Linked List:-

- It always works from left to right
- Deletion occurs from left to right.

Example program of Singly Linked List is attached with this of Lecture.
